Open lab menjadi proyek kuratorial yang berupaya untuk mengatasi isu-isu kontemporer tentang perubahan perkotaan melalui produksi seni kolaboratif. Proyek open lab yang pertama yaitu OPENLAB 4.0 bertujuan untuk mengulik konteks industri di ruang perkotaan di Gresik – Jawa Timur dan mengidentifikasi implikasi positif dan negatifnya terkait dinamika perkembangan tata kota dan pola masyarakatnya.

Proyek ini diinisiasi oleh Nabila Warda sebagai proyek presentasi program XPLORE: New Media Art Incubation “Curating After New Media” yang diselenggarakan oleh Arcolabs dan didukung oleh Goethe Institut Indonesia.

Open lab” has evolved into a curatorial project aimed at addressing contemporary issues related to urban change through collaborative art production. The first project of Open Lab, namely OPENLAB 4.0, aims to explore the industrial context in the urban space of Gresik, East Java, and identify its positive and negative implications concerning the dynamics of urban development and societal patterns.

This project is initiated by Nabila Warda as part of the presentation program XPLORE: New Media Art Incubation “Curating After New Media,” organized by Arcolabs and supported by the Goethe Institut Indonesia.

Nabila warda terlibat dalam kerja-kerja kreatif dan mengelola pameran/proyek seni. Minatnya mengarah pada pengembangan struktur, program penjangkauan & keberlanjutan, dan inklusivitas dalam dunia seni dan budaya. Saat ini ia terlibat aktif di beberapa kolektif dan organisasi seperti Perempuan pengkaji seni, Serbuk kayu, Biennale jatim, Kammari, dll.

Nabila Warda is involved in creative work and manages art exhibitions/projects. Her interests focus on the development of structures, outreach and sustainability programs, and inclusivity in the world of art and culture. Currently, she is actively engaged in several collectives and organizations such as Perempuan Pengkaji Seni, Serbuk Kayu, Biennale Jatim, Kammari, and others.

WRAFT LAB

Sebelum memulai kisah petualangan Waft Lab ini, ucapan terima kasih kami panjatkan kepada seluruh tim Open lab 4.0 serta pihak-pihak yang sudah mendukung lancarnya program ini. Tak juga lupa ucapan terima kasih kami ucapkan pada teman lama kami dari masa depan yang sudah meminjamkan alat mutakhir abad ini: Pensil Komputer. Seluruh kisah perjalanan kami dalam cetakan ini dengan apik dituliskan oleh pensil ini. Panjang umur orang-orang baik.

Before we dive into the Waft Lab adventure, big thanks to the whole Open Lab 4.0 team and everyone who's been the wind beneath our wings for this program. Shoutout to our pals from the future who hooked us up with the coolest gadget of the century: the Computer Pencil. Every bit of our journey in these pages is scribbled down by this trusty pencil. Cheers to good folks and good times ahead!

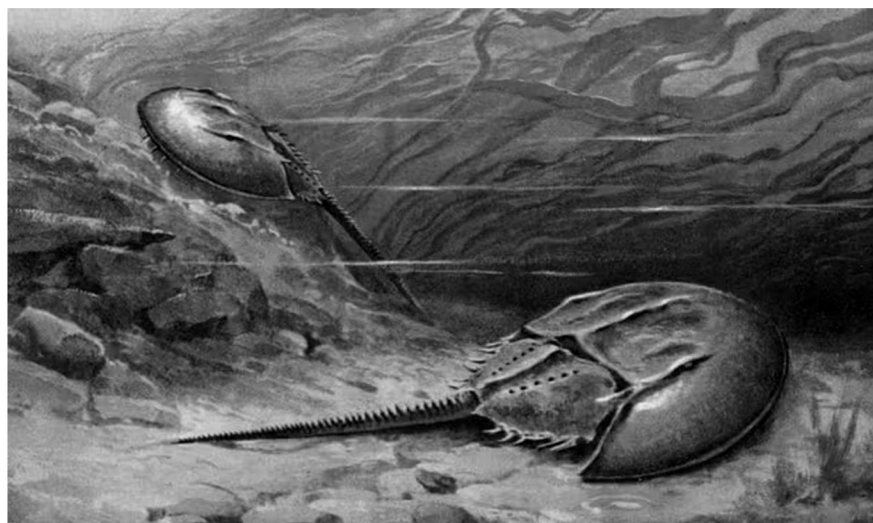

Perjalanan senja membawa kami dari Surabaya ke Gresik, kota yang dikelilingi oleh bayangan dan gemuruh mesin industri. Menyusuri rel kereta yang memotong lanskap semi gersang, kami tiba di kota yang dikuasai oleh jingga langit senja keabu-abuan. Gresik, tersembunyi di balik tirai asap dan puing-puing masa lalu, menyajikan pemandangan yang puitis namun mengharukan. Meneruskan langkah dalam jalan yang dipenuhi jejak-jejak sejarah yang samar, petualangan kami mencapai klimaks saat kami menumpangi perahu yang berlayar di pinggiran pelabuhan industri yang kelam. Cahaya neon memantul di permukaan air, menciptakan refleksi yang melankolis, sementara bunyi mesin dan angin malam membentuk lagu kesepian. Dalam ekspedisi ini, kami tidak hanya menjadi saksi bisu perkembangan kota, tetapi juga berbagi momen magis di antara bayang-bayang industri yang menari di sepanjang cakrawala senja.

The twilight journey carried us from Surabaya to Gresik, a city surrounded by shadows and the roar of industrial machinery. Traversing railway tracks cutting through a semi-arid landscape, we arrived in a city dominated by the orange hues of a twilight sky tinged with gray. Gresik, concealed behind curtains of smoke and remnants of the past, presented a picturesque yet poignant scene. Continuing our steps along paths filled with faint historical traces, our adventure reached its climax as we boarded a boat sailing along the outskirts of the gloomy industrial harbor. Neon lights reflected on the water's surface, creating a melancholic glow, while the sounds of machinery and the night breeze formed a symphony of solitude. In this expedition, we were not merely silent witnesses to the city's development but also shared magical moments amidst the dancing shadows of industry along the twilight horizon.

*PetroArthropodic
Apocalypse; or,
Dawn of Eternal Night:
An Annihilation of Planet Earth
and the Beginning of Merciless
Damnation.*

Saat senja menjelang, kami berada di tepi teluk, menatap tumpukan batu yang menyimpan cerita alam semesta di setiap sudutnya. Sambil meresapi album "PetroDragonic Apocalypse or, Dawn of Eternal Night: An Annihilation of Planet Earth and the Beginning of Merciless Damnation" dari King Gizzard and The Lizard Wizard, pengalaman melihat bangkai arthropoda di antara batu-batu tersebut menjadi bagian dari petualangan kami. Suara eksperimental dan atmosferik dari musik menciptakan suasana yang epik, menyatu dengan pemandangan yang luar biasa di hadapan kami. Bangkai arthropoda memberikan nuansa misterius yang menyentuh hati, sementara langit berubah warna memperindah momen kami di tepi teluk. Dalam sudut pandang kami, kolaborasi antara musik dan keindahan alam menciptakan pengalaman yang mendalam dan penuh kenangan. Kami pun mengadopsi bangkai tersebut dan lahirah lokakarya di esok hari.

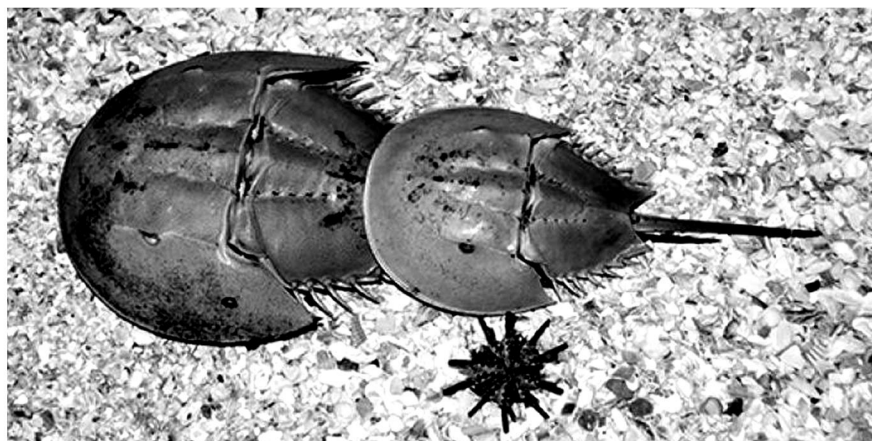

As the sunset approached, we found ourselves by the bay, gazing at a pile of rocks that held the stories of the universe in every corner. Immersed in the album "PetroDragonic Apocalypse or, Dawn of Eternal Night: An Annihilation of Planet Earth and the Beginning of Merciless Damnation" by King Gizzard and The Lizard Wizard, the experience of spotting arthropod carcasses among the rocks became a part of our adventure. The experimental and atmospheric sounds from the music created an epic ambiance, blending seamlessly with the extraordinary scenery before us. The arthropod remains added a mysterious touch to the atmosphere, while the changing colors of the sky enhanced our moment by the bay. From our perspective, the collaboration between music and the beauty of nature created a profound and memorable experience. Inspired by this, we adopted the arthropod remains, giving birth to a workshop the next day.

OpenLab is a free space for students to explore their interests in science, technology, and innovation. It is a place where students can learn from each other, share their ideas, and work on projects together. OpenLab is open to all students, regardless of their background or interests. It is a place where students can learn from each other, share their ideas, and work on projects together.

Lets Rock!

Anatomy

KAMMARI

Kammari adalah rumah, ruang komunal yang berfungsi untuk menunjang produktivitas penghuninya (berkarya). Tempat untuk berjejaring, sarana edukasi, re-kreasi, juga kongsi dagang. Tata ruang yang dapat meredefinisi kampung kota sekitarnya menjadi alternatif eskapisme dari kota baru yang monoton. Kebalauan sosiokultural menjadi alasan Kammari ada untuk memantik atensi publik agar kembali bermain di kota tua Gresik

-

Kammari is a home, a communal space designed to support the productivity of its inhabitants (creating). It serves as a place for networking, educational activities, recreation, as well as a platform for trade. The spatial arrangement can redefine the urban village around it as an alternative escapism from the monotonous new city. Sociocultural diversity is the reason why Kammari exists, aiming to capture public attention and encourage a return to play in the old city of Gresik.
